How to Use *Maps of America the Beautiful*

We designed *Maps of America the Beautiful* to help your student learn about and remember places they read about in the lessons of *America the Beautiful Part 1 and Part 2*. As the student completes the assignments, he or she is creating a historical atlas of the United States.

Completing a Map Assignment

After many lessons in *America the Beautiful*, the student will have a map activity to complete. Look at Map 1. Notice that there are several steps. The student should always complete map assignments in the order the steps are given.

The student will complete some maps all on one day. Map 1 is an example of this. The student will complete other maps slowly over the course of *America the Beautiful*. *America the Beautiful Part 1 and Part 2* will tell the student when to complete a map assignment on a multi-lesson map such as Map 3. Look at Map 3. Notice that the student completes an assignment on this map after many different lessons. Notice that the student finishes Map 3 after Lesson 148.

When coloring in a shape, the student should color neatly and completely, solidly but not too hard. When circling one or more words, the student should make the circles (or ovals) neat, complete, and small. When tracing along a line, the line should be thick enough for the color to be visible.

Important notes: Map assignments at the end of some lessons will instruct the student to complete activities on more than one map on a given day. The student will gain more from this book if he or she completes the map activities as assigned in *America the Beautiful Part 1 and Part 2*. We do not recommend students jumping ahead.

Colored Pencils Recommended

Regular crayons are too thick to complete assignments in *Maps of America the Beautiful*. We recommend a good quality colored pencil brand, such as Prang. Choose a set with the following colors:

red, orange, yellow, green, blue, purple, pink, black, gray, and brown

A Note About State Borders

Borders of various states in the U.S. have changed over time. There were no state borders at all when Columbus first sailed to the Western Hemisphere. However, the maps in *Maps of America the Beautiful* usually show the modern borders for each state, even though during the time period depicted on that map, they may not yet have been the actual state borders. Having the current borders on the maps will help the student know in what state (or future state) an historic event occurred.
